

Do not allow cell phone use in flight. As a 25 year flight attendant I am required to maintain a relaxing and safe cabin environment for all 200 passengers on board. We already deal with people harrassed by loud headphone noise or video games. The nightmare of 50+ people on cell phones on a 5 hour flight will be impossible to monitor. Talk about air rage! During an emergency we will have on the phones instead of listening to evacuation instructions. If phone use is allowed the potential problems onboard will only escalate. The idea is assinine!
